YUKON PERFORMANCE DRIVESHAFTS

OVERVIEW OF A YUKON PERFORMANCE DRIVESHAFT

Yukon Performance Driveshafts offer the highest quality upgrades for your driveshaft needs. Each shaft features premium universal joints and driveshaft components that are engineered to meet the high performance requirements. The driveshaft assembly is held to strict tolerances then precision welded and computer balanced to provide exceptional performance and longevity. Yukon Performance Driveshafts are available off-the-shelf for all front and rear Jeep JK, TJ, LJ CJ5, & CJ8 applications. Custom driveshafts can be made-to-order for racing, off-road, and other custom applications.

PRODUCT ADD-ON OPPORTUNITIES

Yukon Performance Driveshafts come with all hardware and small parts necessary for installation. We recommend associated products are inspected and replaced or upgraded where needed. The pinion crush sleeve / solid preload spacer, pinion seal, and pinion nut are the most common add on items.

Y.E.S. PLAN

The Yukon Extended Service plan is available for all Yukon Performance Driveshafts. The Y.E.S. plan is a no questions asked warranty for as long as the original purchaser owns the vehicle.

ANATOMY OF A YUKON DRIVESHAFT

U-JOINT:

1310 to 1410 sizes available.

SLIP & STUB:

Greasable slip with Glidecoat® on the stub provides continuous lubrication to ensure long life, along with reduced wear and vibrations.

TUBING:

Strict tolerances ensure precision balanced shafts with minimal runout.

DOUBLE CARDAN JOINT:

Allows for increased driveshaft angles and reduced vibrations.

To Differential

To Transfer Case

YOKES:

Heavy duty forged yokes available in conventional and flange styles.
